PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with a CGPA of 8.15 and a 4-month Full Stack Development internship experience. Experienced in building scalable web applications using React, Node.js, Spring Boot, SQL, and MongoDB, with hands-on experience in AI-powered applications and REST API integration. Project lead for AutoMark, a smart attendance platform, with experience coordinating development across frontend, backend, database, and deployment workflows. Strong interest in full-stack development, clean architecture, responsive UI/UX, and practical software engineering.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C, C++
Frontend: HTML5, CSS3, Tailwind CSS, React.js, Next.js, JSP
Backend: Node.js, Express.js, Spring Boot, REST APIs
Databases: MySQL, PostgreSQL, MongoDB Atlas
AI & Real-Time: Gemini API, Socket.IO, TensorFlow.js
Cloud & DevOps: AWS, GCP, Docker, Vercel, Render
Tools: Git, GitHub, VS Code, Postman, Apache Tomcat, phpMyAdmin

EXPERIENCE

Full Stack Development Intern — Athreya Technologies

4 Months

- Developed 10+ responsive UI components using React, JSP, and SQL for web application workflows deployed on Apache Tomcat.
- Identified and fixed 20+ functional and UI bugs through debugging, component testing, and end-to-end validation.
- Performed end-to-end component testing and validation to improve reliability across application workflows.
- Prepared 15+ pages of technical documentation covering implementation details, workflows, and development guidance.

WebDev Department Lead — The Software Society (TSS)

- Led a Web Development team and coordinated technical activities, learning sessions, and project support.
- Trained 30+ students in web development fundamentals and practical development workflows.
- Created a 4-week JavaScript curriculum and prepared onboarding presentations, technical reports, and learning roadmaps.

PROJECTS

AutoMark — Smart Attendance Platform

Project Lead | React/Next.js, Node.js, PostgreSQL, REST APIs, Git/GitHub

- Led the development of a smart attendance platform designed to streamline attendance management for college administrators, faculty, and students.
- Coordinated development across frontend, backend, database, and deployment workflows, driving technical decisions and integration across the team.
- Worked on class creation, timetable management, attendance workflows, role-based operations, and integration with deployed backend services and PostgreSQL.
- Managed development collaboration through Git/GitHub and supported deployment using Vercel and Render.

AI Resume Analyzer

React (Vite), Tailwind CSS, shadcn/ui, Node.js, Gemini API

- Built a full-stack AI resume evaluation application that analyzes resumes against job requirements and generates ATS-oriented match scores and actionable feedback.
- Developed a responsive analysis interface with reusable React components and Tailwind CSS for clear presentation of evaluation results.

AI Mock Interview Prep

React (Vite), Next.js, Tailwind CSS, PostgreSQL, Clerk, Gemini API

- Developed an AI-powered mock interview platform for evaluating candidate responses across communication and technical dimensions.
- Implemented authentication and persistent user state with Clerk and PostgreSQL while integrating Gemini API for AI-driven interview evaluation.

MedJarvis — AI Healthcare Platform

React, Express.js, MongoDB Atlas, Socket.IO, TensorFlow.js, Gemini API, ESP32

- Developed an AI-assisted healthcare platform combining real-time vitals monitoring, digital health profiles, and emergency communication workflows.
- Integrated ESP32-based sensor data, Socket.IO real-time communication, and AI capabilities for health-related assistance and alerts.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science & Engineering

KLS Vishwanathrao Deshpande Institute of Technology, VTU | CGPA: 8.15 | 2027

Diploma — Computer Science & Engineering

K.H. Kabbur Institute of Engineering | CGPA: 8.74 | 2024

SSLC

85.25% | 2021

CERTIFICATIONS

- AWS: Cloud Foundations / AWS Academy Graduate
- Cisco Networking Academy: Introduction to Cybersecurity / Networking
- IBM SkillsBuild & Coursera: Technical Certifications in Web Development & Cloud
- Infosys Springboard: Java & Full Stack Web Development, Cloud Computing, Software Engineering

LEADERSHIP & TECHNICAL ACTIVITIES

- **Project Lead — AutoMark:** Led the development and coordinated frontend, backend, database, and deployment efforts for a smart attendance platform designed for college attendance management.
- **WebDev Department Lead — The Software Society (TSS):** Led a team, trained 30+ students, and developed a 4-week JavaScript learning curriculum with technical onboarding materials.
- Participated in technical hackathons, workshops, and software development events, applying full-stack and AI development skills to practical problems.
